# Website Proposal

Prepared for: Bill & Bea's Drive-In & Espresso
Prepared by: Porter Milloy — Local Web Designer, Centralia WA
Date: April 2026

---

## Overview

This proposal outlines the website I will build for Bill & Bea's Drive-In & Espresso — a clean, mobile friendly site that gives your customers a real destination when they search for you on Google. Right now, people can find you online, but they don't have a clear place to view key information, like menus, photos, or anything that builds confidence before they decide to visit. This website fixes that.

I handle everything. Design, build, hosting, and ongoing maintenance. You don't need to touch a thing.

---

## What's Included

Your website will include the following pages:

- Home — A welcoming landing page with your name, location, hours, and a quick summary of what makes Bill & Bea's special. Includes a Google Maps embed so customers can get directions instantly.
- Menu — A clean, easy-to-read menu page listing your food and espresso offerings so customers know what to expect before they arrive.
- Gallery — A photo section showcasing your food, your space, and the drive-in experience. Photos can come from your existing Google/Yelp listings or anything you have on hand.
- Reviews — A highlights page featuring your best customer reviews to build trust with new visitors. (You have 4.7 stars on Google — let's put that front and center.)
- Contact — Your phone number, address, hours, and a link to your Facebook page so customers can reach you however they prefer.

All pages are fully mobile friendly and look great on phones, tablets, and computers.

Your Facebook page link will be included prominently — since that's where you communicate with regulars, we'll make sure the website points people there too.

---

## Hosting & Maintenance

I take care of all of the technical side so you never have to think about it:

- I purchase and set up your domain name (e.g. billandbeasdrivein.com)

- I host your site on a professional platform — no downtime, no technical headaches
- If something breaks or needs a small update, I fix it — no extra charge
- If you want to add a new menu item, update hours, or swap a photo, just text or email me

You will never need to log in to anything, hire anyone else, or figure out any technology. That's what the monthly retainer covers.

---

## Pricing

| Build Fee — $500 Total | |
|---|---|
| **Due at Start** | $250 — paid before work begins |
| **Due at Launch** | $250 — paid when the site goes live |
| **Monthly Retainer — Two Options** | |
| **Month-to-Month** | $50/month — cancel anytime, no commitment |
| **Annual Plan** | $500/year — save $100, billed once upfront (best value) |
| **What's Covered** | Hosting, maintenance, minor updates, and ongoing support — on both plans |

---

## Timeline

Once we agree to move forward and the first payment is made, here's what to expect:

- Week 1 — I gather your menu, photos, and any details about the business
- Week 2–3 — I build the site and share a preview link for you to review
- Week 3–4 — Any changes are made and the site goes live

Most sites are live within 3–4 weeks from start.

---

## Next Steps

If this all sounds good, here's how we move forward:

- Reply to this email letting me know you'd like to proceed, or ask any questions you have
- We can meet in person or handle everything over email, whatever works best for you

- Once you’re ready, I’ll send over a simple one-page agreement and an invoice for the first $250

I'm local and I'd love to help Bill & Bea's get a website that matches how great the place actually is.
